

EMERGO network

Organisational Development &
Complementary Consulting

Welcome to our presentation !

We are very glad that you are interested in a collaboration with us ...

... and we are quite sure, that you'll benefit from our networked competence and expertise in an sustainable way !

Within our EMERGO network we feel responsible for ...

- Supporting the design and organisation of sustainable success
- Optimising results by the interlocked cooperation of our highly skilled network partners
- Our diversified core competences and a shared set of value

How we see and implement our consulting approach ...

- Consultancy requires a holistic and systemic understanding of an organisation. This is the way to design and implement an effective and sustainable change.
- In a close collaboration to our customers we develop individual architectures for the change approach - to increase their productive efficiency and profitability in a transparent, measurable & sustainable way
- The crucial point is to develop only the most beneficial ways (though there might be a lot of others). The elimination of non-reasonable alternatives is the source of your superiority.

How we see and implement our consulting approach ...

- In close collaboration of customers & consultants the mesh of specialist & process counselling focuses the options for actions
- Complementary consulting uses the alternating extension of our network's diverse know how
- To ensure the necessary multi perspectives we always work in a team of two (principle of reflective staff work)
- The all-embracing energy of our consulting support boosts your entrepreneurial success

Your network Executive Consultants ...
